INITIAL ORTHOPEDIC CONSULT EXAMINATION

CHIEF COMPLAINT: Left shoulder pain.

HISTORY OF PRESENT ILLNESS: A 40-year-old right-hand dominant male involved in a work-related motor vehicle accident on 09/01/2021. While at work, the patient was a driver and was driving bus hit by another SUV. The patient was wearing a seatbelt. The vehicle was struck on the rear driver side. The airbags did not deploy. The police were called to the scene of the accident. The patient was transported via ambulance to Jamaica Hospital and was treated and released the same day. The patient presents today complaining of left shoulder pain sustained in the work-related motor vehicle accident. The patient was attending physical therapy for 2-3 times per week with little relief.

WORK HISTORY: The patient is currently not working.

PREVIOUS TRAUMA: The patient had 2 cases - work injury on left side in September 2021. No fault on the right side in March 2022.

PAST MEDICAL HISTORY: Cardiac.

PAST SURGICAL HISTORY: Arthroscopic surgery of left shoulder in March 2022.

DRUG ALLERGIES: NO KNOWN DRUG ALLERGIES.

MEDICATIONS: The patient is not taking any medication at this time.

SOCIAL HISTORY: The patient is a nonsmoker. The patient does not drink alcohol. The patient does not use recreational drugs.

ADL CAPABILITIES: The patient states that he can walk for 2 blocks. He can stand for 1/2 minutes before he has to sit. He can sit for 1-2 minutes before needing to change positions secondary to pain. As a direct result of the injuries sustained in this accident, the patient states that he is unable to do the following activities: garden, play sports, driving, lifting heavy objects, carrying heavy objects, childcare, laundry, shopping, running errands, kneeling, squatting, negotiating stairs, jogging and exercising.

PRESENT COMPLAINTS: Left shoulder: Left shoulder pain is 7/10, described as constant, sharp, stabbing, dull, achy pain. The patient has stiffness, weakness, and clicking. The patient is unable to reach overhead, unable to reach behind the back, and unable to sleep at night due to pain.

REVIEW OF SYSTEMS: Temperature taken at the time of exam was 98.6 degrees Fahrenheit.
General: No fever, chills, night sweats, weight gain, or weight loss.
HEENT: No double vision, eye pain, eye redness, decreased hearing, earache, ear ringing, nosebleeds, sore throat or hoarseness.
Endocrine: No cold intolerance, appetite changes or hair changes.
Skin: Clear, no rashes or lesions.
Neuro: No headaches, dizziness, vertigo or tremor.
Respiratory: No wheezing, coughing, shortness of breath or difficulty breathing.
Cardiovascular: No chest pain, murmurs, irregular heart rate or hypertension.
GI: No nausea, vomiting, diarrhea, constipation, jaundice or changes in bowel habits.
GU: No blood in urine, painful urination, loss of bladder control or urinary retention.
Hematology: No active bleeding, bruising, anemia or blood clotting disorders.
Psychiatric: No anxiety, change in sleep pattern, depression or suicidal thoughts.

PHYSICAL EXAMINATION: The patient's height is 5 feet 11 inches, weight is 185 pounds, and BMI is 25.8. The left shoulder reveals tenderness to palpation over supraspinatus tendon region. There is no heat, swelling, erythema, crepitus or deformity appreciated. Negative drop arm test. Negative cross-over test. Negative empty can test. Negative Yergason test. Negative deltoid atrophy. Positive O'Brien test. Positive impingement sign. Positive Lift-off test. Positive Hawkins test. Range of motion, as per goniometer, abduction 150/180 degrees, adduction 40/45 degrees, forward flexion 160/180 degrees, extension 45/60 degrees, internal rotation 70/90 degrees, and external rotation 70/90 degrees. Internal rotation to the sacrum. The patient has no motor or sensory deficit of the right upper extremity.

The left knee reveals tenderness along the medial joint line. There is no heat, swelling, erythema, crepitus or deformity appreciated. Positive McMurray test. Negative Lachman test. Positive patellofemoral grinding test. Negative anterior drawer. Negative posterior drawer. Range of motion reveals flexion 120/130 degrees and extension -5/5 degrees. Knee is stable with varus and valgus stress test. The patient has no motor or sensory deficit of the left lower extremity.

DIAGNOSTIC TESTING: MRI of the left shoulder, done on 09/23/2021, shows mild tendinitis changes are seen at the supraspinatus and infraspinatus tendons. A tear is noted at the subscapularis tendon at the upper aspect.

ASSESSMENT:

1. S46.012A Partial rotator cuff tear, left shoulder.
2. M24.812 Internal derangement, left shoulder.
3. M75.02 Adhesive Capsulitis, left shoulder.
4. M75.82 Shoulder tendinitis, left shoulder.
5. S43.432A Labral tear, left shoulder.
6. M75.42 Impingement, left shoulder.
7. M65.812 Tenosynovitis, left shoulder.
8. M75.52 Bursitis, left shoulder.
9. M75.22 Bicipital Tendinitis, left shoulder.
10. M25.512 Pain, left shoulder.
11. S49.92XA Injury, left shoulder.
12. S46.102A Biceps tendon tear, left shoulder.
13. M67.212 Hypertrophic synovitis, left shoulder.
14. M89.312 Acromioclavicular joint hypertrophy, left shoulder.
15. M25.412 Joint effusion, left shoulder.

PLAN:

1. Imaging studies and clinical examinations were reviewed with the patient.
2. All treatment options discussed with the patient.
3. Cold compresses for left shoulder
4. Continue anti-inflammatory and muscle relaxant medications p.r.n.
5. Continue physical therapy for left shoulder 3 days/week.
6. The patient is awaiting MRI of the left knee.
7. Follow up in 4-6 weeks.

IMPAIRMENT RATING: 50%.

CAUSALITY: It is within a certain degree of medical certainty, that the history presented by the patient, the objective physical findings as well as the diagnosis rendered is causally related to the injury the patient incurred on the specified date. These current symptoms were nonexistent prior to the accident. Findings were discussed with the patient.

AFFIRMATION: Being duly licensed to practice medicine in the state of New York, pursuant to the applicable provisions of the Civil Practice Laws and Rules, I hereby affirm under penalty of perjury that the statements contained herein are true and accurate.
