Re: Henry, Marc
DOB: 12/31/1969
DOA: 03/27/2022

INITIAL ORTHOPEDIC CONSULT EXAMINATION

CHIEF COMPLAINT: Right knee, left knee, neck and low back pain.

HISTORY OF PRESENT ILLNESS: A 52-year-old right-hand dominant male involved in a motor vehicle accident on 03/27/2022. The patient was a rear passenger and was wearing a seatbelt. The vehicle was struck on the rear driver's side. The airbags did not deploy. The EMS arrived on the scene. The police were called to the scene of the accident. The patient was transported via ambulance to Brooklyn Hospital and was treated and released the same day. The patient presents today complaining of right knee, left knee, neck and low back pain sustained in the motor vehicle accident. The patient was attending physical therapy 4 times a week with little relief.

WORK HISTORY: The patient is currently not working.

PAST MEDICAL HISTORY: Hyperlipidemia.

PAST SURGICAL HISTORY: Noncontributory.

DRUG ALLERGIES: NO KNOWN DRUG ALLERGIES.

MEDICATIONS: The patient is taking amlodipine 10 mg once a day.

SOCIAL HISTORY: The patient is a smoker. The patient does not drink alcohol. The patient does not use recreational drugs.

ADL CAPABILITIES: The patient states that he can walk for 4 blocks. He can stand for 30 minutes before he has to sit. He can sit for 5 minutes before needing to change positions secondary to pain. As a direct result of the injuries sustained in this accident, the patient states

that he is unable to do the following activities: driving, lifting heavy objects, carrying heavy objects, shopping, running errands, kneeling, squatting, and exercising.

PRESENT COMPLAINTS: Right knee: Right knee pain is 8/10, described as intermittent, sharp, stabbing, dull, achy pain. The patient has stiffness and weakness. The patient has difficulty rising from a chair and difficulty going up and down stairs. The patient also notes clicking, popping, and buckling.

REVIEW OF SYSTEMS: Temperature taken at the time of exam was 98.6 degrees Fahrenheit.
General: No fever, chills, night sweats, weight gain, or weight loss.
HEENT: No double vision, eye pain, eye redness, decreased hearing, earache, ear ringing, nosebleeds, sore throat or hoarseness.
Endocrine: No cold intolerance, appetite changes or hair changes.
Skin: Clear, no rashes or lesions.
Neuro: No headaches, dizziness, vertigo or tremor.
Respiratory: No wheezing, coughing, shortness of breath or difficulty breathing.
Cardiovascular: No chest pain, murmurs, irregular heart rate or hypertension.
GI: No nausea, vomiting, diarrhea, constipation, jaundice or changes in bowel habits.
GU: No blood in urine, painful urination, loss of bladder control or urinary retention.
Hematology: No active bleeding, bruising, anemia or blood clotting disorders.
Psychiatric: No anxiety, change in sleep pattern, depression or suicidal thoughts.

PHYSICAL EXAMINATION: The patient's height is 5 feet 6 inches, weight is 165 pounds, and BMI is 26.6. The right knee reveals tenderness along the medial joint line, superior pole of patella, and inferior pole of the patella. There is crepitus appreciated. There is no heat, swelling, erythema or deformity appreciated. Positive McMurray test. Negative Lachman test. Positive patellofemoral grinding test. Negative anterior drawer. Negative posterior drawer. Range of motion reveals flexion 110/130 degrees and extension -10/5 degrees. Knee is stable with varus and valgus stress test. The patient has no motor or sensory deficit of the right lower extremity.

DIAGNOSTIC TESTING: MRI of the right knee, done on 04/27/2022, shows anterior cruciate ligament sprain sequelae. Horizontal tear of the body and posterior horn of the medial meniscus. Suprapatellar fat impingement.

ASSESSMENT:
1. S83.241A Medial meniscus tear, right knee.
2. M23.91 Internal derangement, right knee.
3. S83.511A Anterior cruciate ligament sprain, right knee.
4. S83.411A Medial collateral ligament sprain, right knee.
5. M94.261 Chondromalacia, right knee.
6. S83.31XA Tear articular cartilage, right knee.
7. M22.2X1 Patellofemoral chondral injury, right knee.
8. M25.461 Joint effusion, right knee.
9. M12.569 Trauma, arthropathy, right knee.
10. S80.911A Injury, right knee.
11. M25.561 Pain, right knee.

12. M65.161 Synovitis, right knee.
13. M24.10 Chondral lesion, right knee.
14. M24.661 Adhesions, right knee.

PLAN:

1. Imaging studies and clinical examinations were reviewed with the patient.
2. All treatment options discussed with the patient.
3. Cold compresses for right knee.
4. Continue anti-inflammatory and muscle relaxant medications p.r.n.
5. Continue physical therapy for right knee 3 days/week.
6. Discussed right knee arthroscopy versus conservative management with the patient. The patient states that due to continual pain and lack of relief with physical therapy and the inability to perform day-to-day activities due to pain, the patient wants to think about surgery.
7. It is medically necessary to perform the suggested surgery to properly diagnose the patient's condition and to objectively verify presence and severity of internal derangement and other right knee pathology in quantitative and qualitative terms and achieve better prognosis. This surgery is crucial to provide most specific and maximally effective treatment to this patient.
8. Discussed the length of the arthroscopy, the postoperative instructions, and the option of continuing with conservative management alternatives to surgery, including no surgery.
9. All the benefits and risks of the right knee arthroscopy have been discussed with the patient. The risks include, but not limited to bleeding, infection, pain, stiffness, muscle injury, nerve injury, DVT, and recurrence.
10. All the questions in regard to the procedure were answered.

CAUSALITY: It is within a certain degree of medical certainty, that the history presented by the patient, the objective physical findings as well as the diagnosis rendered is causally related to the injury the patient incurred on the specified date. These current symptoms were nonexistent prior to the accident. Findings were discussed with the patient.

AFFIRMATION: Being duly licensed to practice medicine in the state of New York, pursuant to the applicable provisions of the Civil Practice Laws and Rules, I hereby affirm under penalty of perjury that the statements contained herein are true and accurate.
