Exam requested by:
GORDON DAVIS DO
1611 E NEW YORK AVE
BROOKLYN NY 11221

SITE PERFORMED: MILL BASIN

SITE PHONE: (718) 220-2500

Patient: BARRETT, CARLEEN
Date of Birth: 03-28-1972
Phone: (646) 963-7337
MRN: 14748729R Acc: 1022864931
Date of Exam: 05-05-2022

EXAM: CT LEFT SHOULDER WITHOUT CONTRAST

Note - This patient has received 4 CT studies and 0 Myocardial Perfusion studies within our network over the previous 12 month period.

HISTORY: History of sickle cell disease. Pain and limited range of motion.

TECHNIQUE: Multiple axial CT images were obtained through the left shoulder without the use of intravenous contrast. Coronal and sagittal images were reconstructed from the axial data. No 3D images were requested. One or more of the following dose reduction techniques were used: automated exposure control, adjustment of the mA and/or kV according to patient size, use of iterative reconstruction technique.

COMPARISON: None.12

FINDINGS:

Osseous structures: No fracture or dislocation. No lytic or sclerotic lesions.

Joints: Moderate osteoarthritis of the glenohumeral joint.
No obvious joint effusion.

Tendons and capsule: No rotator cuff or capsular thickening or obvious fat-filled or fluid-filled tears within the limits of CT technique.

Acromion: No os acromiale.
No subacromial enthesophyte.
The acromion has a curved undersurface with mild lateral downslope.

Subcutaneous tissues: No edema or fluid collection. No mineralization.

Muscles: No selective muscle atrophy or attenuation abnormality. No mineralization.

Lung: The included lung is clear.
