PATIENT NAME: Haynes, Derron J.
DATE OF BIRTH: 7/17/80
REFERRING PHYSICIAN: Dr. Stanley Kim
DATE OF EXAM: 9/12/22

MRI OF THE LEFT ELBOW:

TECHNIQUE: Axial and sagittal images of the left elbow were obtained using spin-echo pulse sequences.

CLINICAL HISTORY: Pain.

FINDINGS: There is an elbow joint effusion. There is capsular thickening.

Joint spaces are preserved.

Marrow signal, cortical bone and articular cartilage are unrevealing.

The visualized tendons, ligaments and neurovascular structures are within normal limits.

IMPRESSION:

1. Elbow joint effusion.
2. Capsular thickening.

Thank you for the courtesy of this consultation.
