Exam requested by:
CATHY DELERME-PAGAN MD
409 ROCKAWAY AVE, 2ND FL
BROOKLYN NY 11212

SITE PERFORMED: LHR LYNBROOK
SITE PHONE: (631) 277-1600

Patient: CODLING-PETERS, KENDRA
Date of Birth: 04-28-1990
Phone: (347) 268-4578
MRN: 15706753R **Acc:** 1024662130
Date of Exam: 10-03-2022

EXAM: CT RIGHT SHOULDER WITHOUT CONTRAST

Note - This patient has received 0 CT studies and 0 Myocardial Perfusion studies within our network over the previous 12 month period.

HISTORY: Pain with history of MVA 8/21/2022

TECHNIQUE: Multiple axial CT images were obtained through the right shoulder without the use of intravenous contrast. Coronal and sagittal images were reconstructed from the axial data. No 3-D images were generated. One or more of the following dose reduction techniques were used: automated exposure control, adjustment of the mA and/or kV according to patient size, use of iterative reconstruction technique.

COMPARISON: None

FINDINGS:

Osseous structures: No fracture or dislocation. No lytic or sclerotic lesions.

Joints: The glenohumeral joint is preserved. No osteophyte or erosions.
Mild acromioclavicular joint arthrosis.
There is no obvious joint effusion.

Tendons and capsule: Probable thickening of the contour of the supraspinatus and infraspinatus tendon, without obvious fat filled or fluid-filled tear within the limits of CT technique and no intrasubstance mineralization.

Acromion: No os acromiale.
No subacromial enthesophyte.
The acromion has a curved undersurface with mild lateral downslope.
No distention of the subacromial/subdeltoid bursa.

Subcutaneous tissues: No edema or fluid collection. No mineralization.

Muscles: No selective muscle atrophy or attenuation abnormality. No mineralization.

Continued: Page 2 of 2

Patient: CODLING-PETERS, KENDRA

Date of Birth: 04-28-1990

Lung: The included lung is clear.

Chest wall: Normal.

IMPRESSION: CT of the right shoulder demonstrates:

1. No fracture, post fracture deformity or subluxation.
2. Probable thickening of the supraspinatus and infraspinatus tendon, without obvious tear within the limits of CT technique.

Thank you for the opportunity to participate in the care of this patient.
