PATIENT NAME: ARIAS, LEWIS
DATE OF BIRTH: 08/12/1992
MRN #: BR47623
DATE OF SERVICE: 08/01/2022 05:20:56 PM
REFERRING PHYSICIAN: COLIN CLARKE, MD

MRI EXAM THE LEFT KNEE WITHOUT CONTRAST

INDICATION: PAIN.

TECHNIQUE: MRI exam of the left knee was performed in sagittal, coronal and axial planes using T1 and T2-weighted sequences.

COMPARISON: There are no prior exams for comparison.

FINDINGS: The right knee is intact. There is no fracture. There are bone bruises in the medial and lateral femoral condyle, and in the patella.

There is a tear of the posterior horn of the medial meniscus. There is a tear of the posterior horn of the lateral meniscus. There is increased signal intensity in the anterior horn of lateral meniscus with a rounded area bright signal intensity consistent with a meniscal cyst. There is strain of the anterior cruciate ligament. The posterior cruciate ligament is maintained. There is strain of the medial collateral ligament. The lateral collateral ligament is preserved.

There is irregularity of the articular margins of the patellofemoral joint consistent with chondromalacia patella. There is a knee effusion. There is prepatellar bursitis.

IMPRESSION:

1. No fracture; bone bruises in the medial and lateral femoral condyle and in the patella.
2. Tear of the posterior horn of the medial meniscus.
3. Tear of the posterior horn of the lateral meniscus and meniscal cyst in the anterior horn of lateral meniscus.
4. Strain of the anterior cruciate ligament and medial collateral ligament.
5. Chondromalacia patella.
6. Effusion.
7. Prepatellar bursitis.

Thank you for the opportunity to participate in the care of this patient.
