Dear Dr. Delorme-Pagan:

**MRI OF THE RIGHT ANKLE****TECHNICAL FACTORS:**

Noncontrast MRI of the right ankle performed utilizing multiplanar and multisequence acquisition.

**FINDINGS:**

There is no fracture, dislocation or bone lesion. The bones and muscular structures demonstrate normal signal intensity. There is no muscular tear or evidence of hematoma formation.

Tibiotalar effusion is seen. There is sprain injury of distal Achilles tendon. Plantar fascia is intact. Sprain injury is seen at distal posterior tibial tendon. Anterior tibial, peroneal, extensor digitorum and flexor hallucis longus tendons are intact as is interosseous and deltoid ligaments.

Sprain injury is seen at posterior talofibular ligament.

**IMPRESSION:**

- Sprain injury is seen at distal posterior tibial tendon.
- Tibiotalar effusion is seen.
