PATIENT NAME: VUEVAS, ALEXANDRO
DATE OF BIRTH: 04/17/2002
MRN #: BR48178
DATE OF SERVICE: 09/27/2022
REFERRING PHYSICIAN: JORDAN FERSEL, MD

MRI EXAMINATION OF THE LEFT SHOULDER WITHOUT CONTRAST

INDICATION: Left shoulder pain. Status post MVA.

TECHNICAL FACTORS: MRI of the left shoulder utilizing multiple imaging sequences.

COMPARISON: None.

FINDINGS:

There is mild hypertrophy of the acromioclavicular capsule. This contacts the bursal surface of the supraspinatus muscle/tendon. A trace amount of fluid is seen in the subacromial-subdeltoid bursa posteriorly.

No rotator cuff tears are seen. No labral tears are identified. The bicipital and intra-articular portions of the biceps tendon are grossly normal.

No areas of significant marrow signal abnormality are seen. The coracoclavicular ligament is intact.

IMPRESSION:

1. Mild hypertrophy of the acromioclavicular capsule contacting the bursal surface of the supraspinatus muscle/tendon.
2. Trace amount of fluid in the subacromial-subdeltoid bursa posteriorly.

Thank you for the opportunity to participate in the care of this patient.

A handwritten signature in black ink that reads "Michael D. Green MD".
