
PATIENT NAME: LLEWELLYN BROWN
REFERRING PHYSICIAN: MIACHEL JURKOWICH
SERVICE: MRI LEFT HAND
DATE OF SERVICE: 06/13/2022

CLINICAL HISTORY: Pain.

TECHNIQUE: Multiplanar and multisequence images were obtained.

FINDINGS:

OSTEOCHONDRAL STRUCTURES: There is normal alignment and morphology of the bones of the hand. There is no evidence for fractures, avascular necrosis or marrow edema. No significant arthritic changes are identified in the joints of the hand.

LIGAMENTS AND TENDONS: The flexor and extensor tendons of the hand have a normal appearance. No evidence of tendon tear or tenosynovitis is noted. No ligamentous abnormalities are identified in the hand. There is no abnormal fluid within the visualized tendon sheaths.

SOFT TISSUES: There are no soft tissue abnormalities identified. There are no solid or cystic masses. There is no edema or atrophy.

IMPRESSION:

Normal MRI of the left hand.

Thank you for the courtesy of this consultation.
