Exam requested by:
JOSEPH WEINSTEIN MD
1150 PARK AVE
NEW YORK NY 10128

cc: J. Weinstein

SITE PERFORMED: LHR ELMHURST
QUEENS BLVD

SITE PHONE: (718) 644-5151

Patient: BARZOLA GUEVARA, JORGE

Date of Birth: 09-28-1988

Phone: (347) 640-7162

MRN: 15109389R Acc: 1023556104

Date of Exam: 06-28-2022

EXAM: MRI LEFT KNEE WITHOUT CONTRAST

HISTORY: Left knee pain, status post injury.

TECHNIQUE: Multiplanar, multisequence noncontrast MRI of the left knee was obtained on a 3T scanner according to standard protocol.

COMPARISON: None

FINDINGS:

Medial compartment: Intact medial meniscus. Generally preserved articular cartilage within the medial compartment.

Lateral compartment: Intact lateral meniscus. Generally preserved articular cartilage within the lateral compartment.

Patellofemoral compartment: Generally preserved patellofemoral articular cartilage.

Collateral ligament complexes: Intact medial and fibular collateral ligaments.

Cruciate ligaments: Intact anterior and posterior cruciate ligaments.

Extensor mechanism: Intact quadriceps and patellar tendons.

Other: Localized synovitis beneath the iliotibial band overlying lateral femoral epicondyle. Small joint effusion/synovitis. No significant fluid distention of the gastrocnemius-semimembranosus bursa. Localized edema within the anteromedial subcutaneous fat compatible with a superficial soft tissue contusion overlying the medial patellofemoral ligament.

IMPRESSION: MRI of the left knee demonstrates:

1. Synovitis beneath the ITB
2. Anteromedial superficial soft tissue contusion
3. Small joint effusion/synovitis
