POST-OPERATIVE NOTE

The patient is status post arthroscopy of the left shoulder on 08/04/2022 and comes today for postoperative follow-up.

Wound VAC removed hardly any discharge. No redness, on Cleocin (almost finished). Tissue culture and sensitivity, no growth 6 days postop. Wound looks a lot better than before.

The patient has 2-3/10 pain.

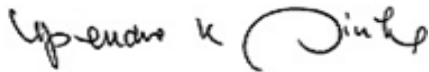

The patient may start home exercise program.

The patient will hold physical therapy until the wound heals.

The patient is to return to office in 4 days on Tuesday at 9:30 a.m. We will remove one stitch during next visit.

Plan is to do dressing change once a day.

IMPAIRMENT RATING: 100%. The patient is currently not working.
