MELLITA SHAKHMUROV, P.A.
79-09 B NORTHERN BLVD
JACKSON HEIGHTS, NY 11372

PATIENT: RICARDO DARRELL GREEN
DOB: 05/18/1985
DOS: 07/31/2022
CHART #: 25478
EXAM: MRI OF THE LEFT KNEE WITHOUT CONTRAST

HISTORY: Lateral medial pain.

COMPARISON: None.

Additional sanitizing / safety protocols recommended by the CDC were performed.

TECHNIQUE: Multiplanar MR imaging of the left knee was performed without contrast on Hitachi open MRI unit.

Coronal PD, T2 and STIR; Sagittal PD and PD fat suppressed; axial T2 and T2 fat suppressed of the knee were obtained.

FINDINGS: There is no evidence of a tracking abnormality.

There is no chondromalacia.

Retinacula appear unremarkable.

There is a grade I injury of the medial collateral ligament.

Lateral collateral ligament is unremarkable.

There is no fracture or bone bruise.

Quadriceps tendon is intact. There is a mild contusion over the proximal patellar tendon.

PCL is unremarkable. The ACL is intact. Lateral meniscus is unremarkable. There is slight blunting of the inner edge noted at the posterior horn of the medial meniscus. A focal vertical tear is noted. Lateral meniscus is unremarkable.

Moderate contusion is seen over the patellar tendon and medial and lateral retinacula.
