Tel: 516 962 9544, 516 962 9599
Cell: 516 549 6963
Fax: 516 467 3130
Email: qri.newhydepark@yahoo.com

PATIENT:	BAKER, MERLE	EXAM DATE:	06/25/2022 2:00 PM
STUDY DESCRIPTION:	MRI KNEE WITHOUT CONTRAST (JOINT)	MRN:	BAKM70704
DOB:	02/29/1952	REFERRING PHYSICIAN:	Jurkovich, Michael
CLINICAL HISTORY:	N/F left knee Pain due to Accident. H/O Left Knee replacement surgery.	GENDER:	F

Extensor mechanisms: Quadriceps and patellar tendons are intact
Peripheral soft tissues: There is prepatellar loculated fluid
Plica: None present

Impression:

1. Limited study due to metallic artifact
2. Prepatellar likely fluid. Suprapatellar joint fluid present

STUDY DESCRIPTION:	MRI KNEE WITHOUT CONTRAST (JOINT)	MRN:	BAKM70704
DOB:	02/29/1952	REFERRING PHYSICIAN:	Jurkowich, Michael
CLINICAL HISTORY:	N/F left knee Pain due to Accident. H/O Left Knee replacement surgery.	GENDER:	F

Magnetic resonance imaging of the left knee with no IV contrast

Clinical history left knee pain due to MVA.
Comparison: None

Description:

Multiplanar, multiecho pulse sequence MRI of the left knee was performed. No IV contrast was given.

Osseous structures/bone marrow: There is no bone marrow edema or osteonecrosis. There is no fracture or subluxation. Knee prosthesis appears intact

Anterior cruciate ligament: Not well visualized due to metallic artifact
Posterior cruciate ligament: Not well visualized due to metallic artifact
Medial collateral ligament: Not well visualized due to metallic artifact
Lateral collateral ligament: Not well visualized due to metallic artifact

Joint spaces

Medial compartment: Not well visualized due to metallic artifact
Lateral compartment: Not well visualized due to metallic artifact
Patellofemoral component not well visualized due to metallic artifact

Synovium/joint fluid: Suprapatellar joint effusion present.
Muscles: No muscle edema or fatty atrophy
Neurovascular structures: Not well visualized due to metallic artifact
