DOB: 02/02/2002
Exam Date: 07/23/2022**N10114570-CA Report Date: 07/26/2022****GORDON DAVIS, DO**
1611 EAST NEW YORK AVE
BROOKLYN, NY 11212-**MAGNETIC RESONANCE IMAGING OF THE RIGHT KNEE****TECHNIQUE:** Multiplanar, multisequential MRI was performed in the recumbent position.**HISTORY:** The patient complains of right knee pain, status post MVA.**INTERPRETATION:** Synovial fluid is identified in the knee joint.

There is lateral patellar tilt and lateral patellar subluxation with narrowing of the lateral patellofemoral joint compartment with patellofemoral chondromalacia.

Patellar tendinosis/tendinopathy is also identified. Fluid posterior to the distal lateral patellar tendon is compatible with localized bursitis/synovitis.

Osseous signal and morphology are otherwise unremarkable. The medial and lateral menisci, the medial and lateral collateral ligaments, the anterior and posterior cruciate ligaments, quadriceps tendon are otherwise unremarkable.

IMPRESSION:

- Synovial fluid in the knee joint.
- Lateral patellar tilt and lateral patellar subluxation with narrowing of the lateral patellofemoral joint compartment with patellofemoral chondromalacia.
- Patellar tendinosis/tendinopathy.
