

## Final Report

Name: **FRED OGDEN**

Date of Birth: Aug 19, 1994 00:00:00

Referring Physician: ALEKSANDR KAPACH PA.

Accession/MRN: **224036-3 / 269596/1**

Date of Service: May 24, 2022 12:10:28

Approval Date: May 26, 2022 12:23:00

**Description:** CT RT KNEE W/O

### **CT SCAN OF THE RIGHT KNEE**

**Clinical History:** Knee pain; status-post MVA.

**Protocol:** 2.5 mm axial images through the right knee; sagittal and coronal reformatted images.

**Findings:** The distal femoral cortex is normal. There is no marrow lesion. The medial and lateral femoral condyles are normal in appearance.

There is no tibial plateau fracture. The fibular head appears normal.

There is lateral tracking of the patella with a suprapatellar effusion. There is no patellar fracture or dislocation.

The gastrocnemius muscles are normal in appearance. The quadriceps tendon and patellar tendons are normal in position and appearance.

### **IMPRESSION:**

1. MODERATE LATERAL TRACKING OF THE PATELLA WITH SUPRAPATELLAR EFFUSION.
2. NO ACUTE FRACTURES OR OSTEOCHONDRAL LESION. GASTROCNEMIUS MUSCLES ARE NORMAL.
