933 Saw Mill River Road

Ardsey, NY 10502

Phone: 914-740-1188 Fax: 914-478-0303

PATIENT: JACKSON TASHAY
DOB: 01/17/1990
PHYSICIAN: DR. WALKER
EXAM DATE: 07/13/2022

MRI OF THE RIGHT HAND

INDICATION: Pain.

TECHNIQUE: Multiple T1 and T2 weighted MRI images of the right hand were obtained in axial, sagittal and coronal planes without administration of intravenous contrast.

FINDINGS: No acute displaced fractures, dislocations, destructive bony lesions or marrow infiltration. Fluid in the metacarpophalangeal joints consistent with trauma or synovitis, an appropriate clinical setting. The carpal bone alignment is intact. No subcutaneous soft tissue lesions or discrete fluid collections.

IMPRESSION:

1. No acute displaced fractures, dislocations, destructive bony lesions or marrow infiltration.
2. No subcutaneous soft tissue lesions or discrete fluid collections.
3. Fluid in the metacarpophalangeal joints consistent with trauma or synovitis, an appropriate clinical setting.
