Fax: (718) 223-2932

PATIENT NAME: Linda Jackson
DOB: 12/12/1972
DATE OF SERVICE: 3/21/2022
REFERRING DOCTOR: Adnan A. Qureshi, M.D.**MRI Left Shoulder:**

TECHNIQUE: Magnetic Resonance Imaging is Performed in Multiple Projections Utilizing T1/T2 Pulse Sequences.

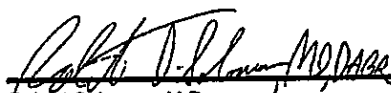

FINDINGS:

Joint fluid and/or effusion noted. Positioning somewhat limits axial dataset. Biceps tenosynovitis. Magnetic susceptibility artifact incidentally over acromion, AC joint narrowing. Impingement and outlet syndrome of the arch upon the cuff tendons. Synovitis, patulous axillary pouch of the inferior left glenohumeral ligament. Inferior labral and superior labral tear on the coronal dataset. Cuff tendons are attenuated with tendinosis, supra and infraspinatus, subscapularis portions on the orthogonal sequences.

IMPRESSION:

1. Impingement and outlet syndrome.
2. AC joint narrowing.
3. Attenuated cuff tendons.
4. Cuff tendinosis.
5. Synovitis.
6. Joint fluid and/or effusion.
7. Labral hypoplasia and tearing.

Thank you for the courtesy of this consultation.

Robert Solomon, M.D.
Diplomat, American Board of Radiology
