PATIENT NAME: SIMMONS, JASMIN
DATE OF BIRTH: 01/22/1986
MRN #: BK14572
DATE OF SERVICE: 06/20/2022 08:30:33 PM
REFERRING PHYSICIAN: RICHARD BADKE, MD

MRI EXAM OF THE LEFT ANKLE WITHOUT CONTRAST

INDICATION: Left ankle pain.

TECHNIQUE: MRI exam of the left ankle was performed in sagittal, axial and coronal planes using T1 and T2 weighted sequences.

COMPARISON: There are no prior exams for comparison.

FINDINGS: The left ankle is intact. There is no fracture. There are bone bruises in the anterior aspects of the tibia, calcaneus and talus. The ankle joint is maintained with smooth articular margins. The subtalar and talonavicular joints are maintained. There are no erosive arthritic changes.

The Achilles tendon is intact. There is tendinopathy of the flexor hallucis longus tendon. The medial ankle tendons are otherwise intact. The lateral and anterior ankle tendons are maintained.

There is a tear of the anterior talonavicular ligament. The posterior talonavicular and collateral ligaments are intact.

IMPRESSION:

1. No fracture; bone bruises in the distal tibia, talus and calcaneus.
2. Intact ankle joint.
3. Tendinopathy of the flexor hallucis longus tendon.
4. Tear of the anterior talonavicular ligament.

Thank you for the opportunity to participate in the care of this patient.
