PATIENT NAME: Jan Marvin Mercado

DOB: 2/5/1990

DATE OF SERVICE: 10/27/2021

REFERRING DOCTOR: Trishanna Yankannah, PA-C

MRI Left Elbow:

TECHNIQUE: Magnetic Resonance Imaging is Performed in Multiple Projections Utilizing T1/T2 Pulse Sequences.

FINDINGS:

Osseous structures maintain unremarkable alignment and signal characteristics. Suspicion is not raised for fracture, subluxation or marrow replacement. Intact radial head and olecranon. Osteoarthropathy and avascular necrosis have not developed. Some joint fluid is present. Visualized annular and collateral ligaments are free from interruption. Flexor and extensor tendon compartment insertions are without frank rupture. Fascial planes along lateral epicondyle are indurated. Biceps and triceps tendon insertions are preserved as well. No periarticular mass is declared.

IMPRESSION:

1. Evidence for lateral epicondylitis.
2. No gross bony derangement suspected.

Thank you for the courtesy of this consultation.
