PATIENT NAME AUGUSTIN, MARIE
D.O.B. 06/20/1965
PATIENT # 0000013202
DATE OF SERVICE 3/29/2022 1:19:18 PM
REF. PHYSICIAN RAHMAN, QUAZI MD

MRI OF THE RIGHT SHOULDER WITHOUT CONTRAST

INDICATION: Right shoulder pain

COMPARISON: No prior study was available for comparison at the time of dictation.

TECHNIQUE: T1, T2, and PD, axial, coronal, and sagittal sequences were obtained.

FINDINGS:

No fracture or suspicious lesion. No os acromiale or intra-articular loose body. Glenohumeral joint space narrowing, scapular glenoid mild to moderate cartilaginous fraying, as well as both greater tuberosity, both anterior and inferomedial humeral osteophytosis.

Suggestive shoulder impingement with low-lying acromion on both supraspinatus and infraspinatus tendons, with concomitant tendinosis. There is an interstitial tear beginning at the conjoined region of both infraspinatus, supraspinatus tendons, extending anteriorly where there is a more suggested full-thickness tear and also concern for retraction of up to 8.8 mm of the anterior insertional fibers series 5 image 8.

Acromioclavicular arthrosis with capsular sprain and subacromial bursitis.

Labrum grossly intact. Subscapularis tendinopathy and sprain of superior glenohumeral ligament. Biceps tendon, biceps labral anchor complex intact.

Teres minor tendon is normal. No muscle atrophy.

IMPRESSION:

1. Suggestive shoulder impingement with low-lying acromion on both supraspinatus and infraspinatus tendons, with concomitant tendinosis. There is an interstitial tear beginning at the conjoined region of both infraspinatus, supraspinatus tendons, extending anteriorly where there is a more suggested full-thickness tear and also concern for retraction of up to 8.8 mm of the anterior insertional fibers series 5 image 8.

REF. PHYSICIAN RAHMAN, QUAZI MD

- AC joint arthrosis and subacromial bursitis.
- 2. Glenohumeral osteoarthritic changes as described.
- 3. Mild subscapularis tendinopathy and sprain of superior glenohumeral ligament. Biceps tendinopathy and tenosynovitis with proximal peritendinous free fluid.

Thank you for this kind referral of this patient.
