PATIENT NAME: MARCELINO, ANGEL
DATE OF BIRTH: 08/18/1983
MRN #: BR48414
DATE OF SERVICE: 09/29/2022
REFERRING PHYSICIAN: JORDAN FERSEL, MD

<ADDENDUM SIGNED BY REGINALD DENIS, MD AT 10/12/2022 12:12:26 PM

This report is being amended to reflect the correction of a typographical error on the title which should read as follows:

PROCEDURE: MRI OF THE RIGHT SHOULDER

ADDENDUM END>

PROCEDURE: MRI OF THE LEFT SHOULDER

INDICATION: PAIN. Date of accident: 08/12/2022.

TECHNIQUE: Multiple pulse sequences were obtained in the coronal, sagittal and axial planes.

COMPARISON: None

FINDINGS: The subcutaneous tissues are maintained. The musculature is maintained.

Inferior subluxation of the acromion by 1.3 cm is noted in respect to the distal clavicle consistent with acromioclavicular ligament tear. Moderate effusion is identified.

Effusion is noted at the glenohumeral joint.

The labrum is intact.

The biceps tendon is intact.

Tendinopathy is noted involving the subscapularis tendon with a distal partial tear.

There is tendinopathy of the supraspinatus tendon. There is tendinopathy of the infraspinatus tendon. The teres minor tendon is intact.

IMPRESSION:
