POST-OPERATIVE NOTE

The patient is status post arthroscopy of the right knee on 05/26/2022 and comes today for postoperative follow-up.

There is no evidence of any drainage, redness, or discharge from the surgical site.

There is no swelling or edema.

There is no wound dehiscence or complications.

There is no calf tenderness.

There is negative Homans sign.

The patient is afebrile.

The patient has regained almost full mobility of the knee.

The patient has intermittent pain 9/10. The patient has pain only when working out occasionally.

There is no tenderness noted. Range of motion reveals flexion 125/130 degrees and extension 5/5 degrees.

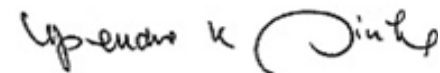

The patient may start home exercise program.

The patient is ambulating and full weight-bearing without any support.

The patient was advised physical therapy 3 times a week for 6 weeks to regain full mobility of the right knee.

The patient will return to office as needed.
