Dear Dr. Kopach:

MRI OF THE RIGHT KNEE

TECHNICAL FACTORS:

Noncontrast MRI of the right knee performed utilizing multiplanar and multisequence acquisition.

FINDINGS:

There is no fracture, dislocation or bone lesion. The bones and muscular structures demonstrate normal signal intensity. There is no muscular tear or evidence of hematoma formation.

Joint effusion is present. Retinacular ligaments are intact as is the quadriceps and patellar tendon.

Sprain injury is seen at distal anterior cruciate ligament. Posterior cruciate ligament and collateral ligaments are intact. Horizontal tear is seen involving the posterior horn of the medial meniscus. Menisci are otherwise intact.
