Dear Dr. Kopach:

### **MRI OF THE LEFT KNEE**

#### **TECHNICAL FACTORS:**

Noncontrast MRI of the left knee performed utilizing multiplanar and multisequence acquisition.

#### **FINDINGS:**

There is no fracture, dislocation or bone lesion. The bones and muscular structures demonstrate normal signal intensity. There is no muscular tear or evidence of hematoma formation.

Joint effusion is present. Retinacular ligaments are intact as is the quadriceps and patellar tendon.

Sprain injury is seen at distal anterior cruciate ligament and proximal medial collateral ligament. Posterior cruciate ligament and lateral collateral ligament are intact.

Inferior surface horizontal tears are seen at posterior one-third of posterior horns of both medial and lateral menisci. Anterior meniscal horns are intact.
