PATIENT NAME: RAMOS, ANGEL  
PATIENT DOB: 11/14/1985  
CHART NUMBER: 045335  
EXAM DATE: JUNE 20, 2022  
REFERRING PHYSICIAN: DR. FERSEL, JORDAN

**MRI OF THE RIGHT KNEE**

**Clinical History:** Pain; s/p injury.

**Protocol:** T1 and T2 axial and sagittal images

**Findings:** The anterior and posterior horns of the medial and lateral menisci are normal in configuration. There is no acute medial or lateral meniscal tear.

The anterior cruciate ligament is intact but irregular in appearance consistent with sprain or partial tear. The posterior cruciate ligament is normal. The medial and lateral collateral ligaments are intact. The quadriceps tendon and patellar tendons are normal.

There is a suprapatellar effusion. There is no patellar fracture or dislocation. The medial and lateral patellar facets demonstrate normal cartilaginous thickness and retinacular attachments.

Normal marrow signal is present in the femoral condyles and the tibial plateau. There is no fracture, contusion, or osteochondral lesion.

The popliteus tendon is intact. The gastrocnemius muscles are normal in signal intensity. The popliteal fossa is unremarkable.

**IMPRESSION:**

1. SPRAIN OR PARTIAL TEAR OF THE ANTERIOR CRUCIATE LIGAMENT.
2. SUPRAPATELLAR AND INTRAARTICULAR JOINT EFFUSION.
3. NO ACUTE MENISCAL TEAR OR OSTEOCHONDRAL LESION.

Thank you for the courtesy of this referral.
