PATIENT:	ARIAS, DELA CRUZ ANDRES	EXAM DATE:	06/24/2022 4:15 PM
STUDY DESCRIPTION:	MRI ANKLE WITHOUT CONTRAST (JOINT)	MRN:	ARID70309
DOB:	11/05/1957	REFERRING PHYSICIAN:	Mcgee, John J
CLINICAL HISTORY	C/O LT ANKLE PAIN DUE TO MVA	GENDER	M

MAGNETIC RESONANCE IMAGING OF LEFT ANKLE WITHOUT CONTRAST
HISTORY: Complains of left ankle pain due to motor vehicle accident.

TECHNIQUE: Multiplanar, multi-sequence MRI of the left ankle was performed without intravenous contrast.
COMPARISON: None available.

FINDINGS:

OSSEOUS STRUCTURES/MARROW: A bone contusion of the lateral malleolus noted. No fractures or osteonecrosis.

LIGAMENTS:

TIBIO-FIBULAR SYNDESMOTIC: The lower syndesmotic ligaments are intact.

ANTERIOR TALOFIBULAR: The anterior talofibular ligament is intact.

POSTERIOR TALOFIBULAR: Hyperintense signal of the fibular attachment of the posterior talofibular ligament noted compatible with a partial tear.

CALCANEOFIBULAR LIGAMENT: The posterior calcaneofibular ligament is intact.

DELTOID LIGAMENT COMPLEX: The deltoid ligament-complex is intact.

TENDONS:

ACHILLES: The Achilles tendon is intact.

PERONEAL: The peroneal tendon is intact.

MEDIAL FLEXOR: The medial flexor tendon is intact.

ANTERIOR EXTENSOR TENDON: The anterior extensor tendon is intact.

MUSCLES: There is no intramuscular edema or fatty muscle atrophy.

PLANTAR FASCIA: The plantar fascia is intact.

CARTILAGE/SUBCHONDRAL BONE: The cartilage of the tibiotalar, subtalar, talonavicular, and calcaneocuboid joints is intact.

SYNOVIUM /JOINT FLUID: No synovial thickening or joint effusion.

SINUS TARSI: Normal.

NEUROVASCULAR STRUCTURES: Normal in course and caliber.

PERIPHERAL SOFT TISSUES: Normal.

IMPRESSION:

1. Bone contusion of the lateral malleolus
2. Hyperintense signal of the fibular attachment of the posterior talofibular ligament compatible with a partial tear.
