INITIAL ORTHOPEDIC CONSULT EXAMINATION

CHIEF COMPLAINT: Right shoulder pain.

HISTORY OF PRESENT ILLNESS: A 45-year-old right-hand dominant female involved in a motor vehicle accident on 02/10/2022. The patient was a driver and was wearing a seatbelt. The vehicle was struck on the passenger's front side. The airbags did not deploy. The EMS did not arrive on the scene. The police were not called to the scene of the accident. The patient did not go to any hospital that same day. The patient presents today complaining of right shoulder pain sustained in the motor vehicle accident. The patient was attending physical therapy for more than 4 months with good relief.

WORK HISTORY: The patient is currently working.

PAST MEDICAL HISTORY: Noncontributory.

PAST SURGICAL HISTORY: C-section in 2008.

DRUG ALLERGIES: NO KNOWN DRUG ALLERGIES.

MEDICATIONS: The patient is taking pain medications p.r.n.

SOCIAL HISTORY: The patient is a nonsmoker. The patient drinks alcohol socially.

ADL CAPABILITIES: As a direct result of the injuries sustained in this accident, the patient states that she is unable to do the following activities: driving, lifting heavy objects, carrying, reaching overhead, laundry, shopping, running errands, and exercising.

PRESENT COMPLAINTS: Right shoulder: Right shoulder pain is 2/10, described as intermittent, sharp, stabbing, dull, achy pain. The patient has no stiffness, weakness, popping, or clicking. The patient is unable to reach overhead or behind the back. Worse with range of motion and improves with physical therapy.

REVIEW OF SYSTEMS: Temperature taken at the time of exam was 98.6 degrees Fahrenheit.

General: No fever, chills, night sweats, weight gain, or weight loss.

HEENT: No double vision, eye pain, eye redness, decreased hearing, earache, ear ringing, nosebleeds, sore throat or hoarseness.

Endocrine: No cold intolerance, appetite changes or hair changes.

Skin: Clear, no rashes or lesions.

Neuro: No headaches, dizziness, vertigo or tremor.

Respiratory: No wheezing, coughing, shortness of breath or difficulty breathing.

Cardiovascular: No chest pain, murmurs, irregular heart rate or hypertension.

GI: No nausea, vomiting, diarrhea, constipation, jaundice or changes in bowel habits.

GU: No blood in urine, painful urination, loss of bladder control or urinary retention.

Hematology: No active bleeding, bruising, anemia or blood clotting disorders.

Psychiatric: No anxiety, change in sleep pattern, depression or suicidal thoughts.

PHYSICAL EXAMINATION: The patient's height is 5 feet 5 inches, weight is 145 pounds, and BMI is 24.1. The right shoulder reveals no tenderness to palpation. There is no swelling, heat, erythema, or deformity appreciated. There is crepitus appreciated. Negative drop arm test. Negative cross-over test. Negative empty can test. Negative Yergason test. Negative deltoid atrophy. Negative O'Brien test. Negative impingement sign. Negative Lift-off test. Negative Hawkins test. Range of motion, as per goniometer, abduction 165/180 degrees, adduction 45/45 degrees, forward flexion 160/180 degrees, extension 55/60 degrees, internal rotation 80/90 degrees, and external rotation 85/90 degrees. Internal rotation to the mid back. The patient has no motor or sensory deficit of the right upper extremity.

DIAGNOSTIC TESTING: MRI of the right shoulder, done on 03/19/2022, shows superior labral fraying. Capsular thickening which can be seen with adhesive capsulitis. AC joint arthrosis. Rotator cuff tendinopathy. Enlarged axillary lymph nodes which are nonspecific. This should be correlated with patient's clinical history and laboratory values.

ASSESSMENT:

1. M24.811 Internal derangement, right shoulder.
2. M75.01 Adhesive capsulitis, right shoulder.
3. M75.81 Shoulder tendinitis, right shoulder.
4. S43.431A Labral tear, right shoulder.
5. M25.511 Pain, right shoulder.
6. S49.91XA Injury, right shoulder.
7. M89.3 11 Acromioclavicular joint hypertrophy, right shoulder.

PLAN:

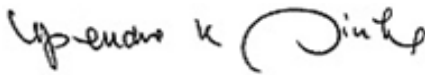

1. Imaging studies and clinical examinations were reviewed with the patient.
2. All treatment options discussed with the patient.

3. Cold compresses for right shoulder.
4. Continue anti-inflammatory and muscle relaxant medications p.r.n.
5. Continue physical therapy for right shoulder 3 days/week.
6. Recommend steroid injections with pain management for right shoulder. The patient refuses due to side effects.
7. Discussed right shoulder arthroscopy versus conservative management with the patient. The patient states that due to continual pain and lack of relief with physical therapy and the inability to perform day-to-day activities due to pain, the patient wants to think about surgery.
8. It is medically necessary to perform the suggested surgery to properly diagnose the patient's condition and to objectively verify presence and severity of internal derangement and other right shoulder pathology in quantitative and qualitative terms and achieve better prognosis. This surgery is crucial to provide most specific and maximally effective treatment to this patient.
9. Discussed the length of the arthroscopy, the postoperative instructions, and the option of continuing with conservative management alternatives to surgery, including no surgery.
10. All the benefits and risks of the right shoulder arthroscopy have been discussed with the patient. The risks include, but not limited to bleeding, infection, pain, stiffness, muscle injury, nerve injury, DVT, and recurrence.
11. All the questions in regard to the procedure were answered.
12. Follow up on a p.r.n. basis.

CAUSALITY: It is within a certain degree of medical certainty, that the history presented by the patient, the objective physical findings as well as the diagnosis rendered is causally related to the injury the patient incurred on the specified date. These current symptoms were nonexistent prior to the accident. Findings were discussed with the patient.

AFFIRMATION: Being duly licensed to practice medicine in the state of New York, pursuant to the applicable provisions of the Civil Practice Laws and Rules, I hereby affirm under penalty of perjury that the statements contained herein are true and accurate.
