

MULTI-POSITION MRI

**STAND-UP MRI OF MANHATTAN, P.C.**

301 and 305(Suite 102) E. 55th Street • New York, NY 10022

Phone: 212.772.2300 • Fax: 212.772.2032

**STAND-UP MRI and 3T MRI****MERICCY VASQUEZ VEGA****N10123999-  
ME****Report Date: 09/07/2022****DOB: 04/22/1982****Exam Date: 09/06/2022****AJIN MATHEW PA****1320 LOUIS NINE BLVD  
BRONX, NY 10459****MRI OF THE LEFT SHOULDER WITHOUT CONTRAST****INDICATION:** Pain**COMPARISON:** No prior study was available for comparison at the time of dictation.**TECHNIQUE:** T1, T2, and PD, axial, coronal, and sagittal sequences were obtained.**FINDINGS:**

High-grade partial tear of the anterior supraspinatus tendon at the insertion of the critical zone with tendinopathy and fraying of the remainder of the tendon. Tendinopathy and bursal surface fraying of the infraspinatus tendon. Partial interstitial tear of the central fibers of the subscapularis tendon at the insertion with tendinopathy. Tendinopathy and tenosynovitis of the long head of the biceps tendon. Tear of the posterior, superior, and anterior labrum. Mild subacromial bursitis. Moderate AC joint arthrosis. Lateral downsloping acromion which may cause impingement.

No fracture. Bone marrow signal is normal. Glenohumeral cartilage is intact.

The inferior glenohumeral ligament is intact. Teres minor tendon is normal. No muscle atrophy.

No effusion.

**IMPRESSION:**

- High-grade partial tear of the anterior supraspinatus tendon at the insertion of the critical zone with tendinopathy and fraying of the remainder of the tendon.
- Tendinopathy and bursal surface fraying of the infraspinatus tendon.
- Partial interstitial tear of the central fibers of the subscapularis tendon at the insertion with tendinopathy.
- Tendinopathy and tenosynovitis of the long head of the biceps tendon.
- Tear of the posterior, superior, and anterior labrum.
