UPENDRA SINHA MD
102-31 JAMAICA AVE
RICHMOND HILL NY 11418

SITE PERFORMED: KEW GARDENS
SITE PHONE: (718) 544-5151

Patient: OLIVO, JUAN
Date of Birth: 07-19-1982
Phone: (917) 951-4517
MRN: 15864796R **Acc:** 1024953799
Date of Exam: 10-27-2022

EXAM: ULTRASOUND RIGHT SHOULDER

HISTORY: Evaluate mass.

TECHNIQUE: Ultrasound imaging of the right shoulder was performed utilizing grayscale and power Doppler techniques. The exam was targeted to evaluate area of concern..

COMPARISON: None available.

FINDINGS:

Centered within the subcutaneous fat at the superior shoulder is a 7.4 x 5.9 x 2.0 cm well-circumscribed lesion. The lesion is isoechoic to surrounding fat. There are small vessels at the periphery of the mass. There is no adjacent intramuscular edema or invasion.

Mild acromioclavicular joint arthrosis.

IMPRESSION: Ultrasound imaging of the right shoulder demonstrates:

7.4 cm lipomatous mass lesion at the area of concern at the superior shoulder. Further evaluation is recommended with MRI of the shoulder with and without contrast (chest wall, soft tissue mass protocol, with markers).

Thank you for the opportunity to participate in the care of this patient.
