

BRONX DIAGNOSTIC RADIOLOGY, P.C.

2500 St. Raymond Avenue Bronx, NY, 10461
Phone:(718) 369-1200 Fax:(718) 223-2932

PATIENT NAME:	LISA BLAKE	DOB:	02/09/1975
REFERRING PHYSICIAN:	AUGUSTUS IGBOKWE, PA-C	ACCESSION #:	
DATE OF SERVICE:	05/10/2022	MRN:	1554
SERVICE:	MRI LEFT KNEE		

TECHNIQUE: Magnetic Resonance Imaging Is Performed In Multiple Projections Utilizing T1/T2 Pulse Sequences.

FINDINGS:

Joint effusion is noted. Lateral patellar tilt and subluxation. Suprapatellar plica. Prepatellar edema and/or bursitis. Patella alta and high position of the patella. Marrow distribution probably physiologic. ACL sign hemi-bundle tear. Posterior cruciate ligament is unrevealing. Menisci are small. There is abnormal signal in the posterior horn of the medial meniscus, consistent with tear. Lateral meniscus is unrevealing. Meniscal cups and meniscofemoral and transverse meniscal ligaments are unrevealing. Lateral collateral ligament and lateral capsular partial tear, consider lateral trauma. Iliotibial band syndrome, hypertrophy of Gerdy's tubercle of proximal fibula. Narrowing of the femoral tibial compartments. Superficial varicose veins are noted.

IMPRESSION:

1. Iliotibial band syndrome.
2. Partial lateral collateral ligament and lateral capsular tear.
3. Joint effusion.
4. Prepatellar edema and/or bursitis.
5. Hemi-bundle partial ACL tear.
6. Tear of the posterior horn of the medial meniscus.

Thank you for the courtesy of this consultation.
