PATIENT NAME: JOHNSON, CURTIS
PATIENT DOB: 05/13/1992
CHART NUMBER: 045129
EXAM DATE: JUNE 26, 2022
REFERRING PHYSICIAN: DR.FERSEL, JORDAN

MRI OF THE LEFT KNEE

Clinical History: Pain; s/p injury.

Protocol: T1 and T2 axial and sagittal images

Findings: The anterior and posterior horns of the medial and lateral menisci are normal in configuration. There is no acute medial or lateral meniscal tear. The cartilaginous surfaces in the medial and lateral compartments are well maintained.

There is high grade partial tear of the anterior cruciate ligament with intraarticular joint fluid. The posterior cruciate ligament is normal. There is a sprain of the medial collateral ligament. The lateral collateral ligament is intact. The quadriceps tendon and patellar tendons are normal.

There is fluid present in the suprapatellar bursa. The medial and lateral patellar facets demonstrate normal cartilaginous thickness and retinacular attachments.

There are no acute femoral, tibial or fibular fractures or acute osteochondral lesion.

The popliteus tendon is intact. The gastrocnemius muscles are normal in signal intensity. The popliteal fossa is unremarkable.

IMPRESSION:

1. HIGH GRADE PARTIAL TEAR OF THE ANTERIOR CRUCIATE LIGAMENT WITH INTRAARTICULAR JOINT EFFUSION.
2. SPRAIN OF THE MEDIAL COLLATERAL LIGAMENT AND SUPRAPATELLAR EFFUSION.
3. NO ACUTE MENISCAL TEAR OR OSTEOCHONDRAL LESION.

Thank you for the courtesy of this referral.
