481 NORTH 13TH STREET, NEWARK N.J. 07107, TEL:973-481-7770 FAX: 973-481-7755

PATIENT NAME: DOMINGUEZ LORA, ALTAGRACIA

DATE OF BIRTH: 01/21/1995 MRN #: M19247

DATE OF SERVICE: 05/03/2022 02:17:17 PM REFERRING PHYSICIAN: JORDAN FERSEL, MD

MRI EXAM OF THE LEFT SHOULDER WITHOUT CONTRAST

INDICATION: MVA; left shoulder pain; assess for RCT.

TECHNIQUE: MRI exam of the left shoulder was performed in sagittal, axial and coronal planes using T1 and T2 weighted sequences.

COMPARISON: There are no prior exams for comparison.

FINDINGS: The visualized bony structures are intact. There is no fracture or focal bony lesion. There is spurring of the acromioclavicular joint.

There is tendinopathy and tear of the supraspinatus tendon with increased signal intensity seen throughout the distal porton of the tendon on T2 weighted images, and with fluid in the subacromium and subdeltoid bursae. There is tendinopathy and partial tear of the infrapsinatus tendon. The teres minor and subscapularis tendons are intact.

The glenohumeral joint is maintained. The anterior and posterior glenoid labrum are intact. There is a joint effusion.

IMPRESSION:

- 1. No fracture or focal bony lesion; spurring of the acromioclavicular joint.
- 2. Tendinopathy and tear of the supraspinatus tendon.
- 3. Tendinopathy and partial tear of the infraspinatus tendon.
- 4. Intact glenohumeral joint.
- 5. Effusion.

Thank you for the opportunity to participate in the care of this patient.
