PATIENT NAME:

RAMOS, ANGEL

PATIENT DOB:

11/14/1985

CHART NUMBER:

045335

EXAM DATE:

JUNE 20, 2022

REFERRING PHYSICIAN:

DR. FERSEL, JORDAN

MRI OF THE LEFT KNEE

Clinical History: Pain; s/p injury.

Protocol: T1 and T2 axial and sagittal images

Findings: The anterior and posterior horns of the medial and lateral menisci are normal in configuration. There is no acute medial or lateral meniscal tear. The cartilaginous surfaces in the medial and lateral compartments of the knee are well maintained.

There is partial tear of the anterior cruciate ligament with intraarticular joint fluid. The posterior cruciate ligament is normal. The medial and lateral collateral ligaments are intact. The quadriceps tendon and patellar tendons are normal.

There is lateral tracking of the patella with suprapatellar effusion. There is no patellar fracture or dislocation.

Normal signal is present in the femoral condyles and the tibial plateau. There is no acute fracture or osteochondral lesion.

The popliteus tendon is intact. The gastrocnemius muscles are normal in signal intensity. The popliteal fossa is unremarkable.

IMPRESSION:

- 1. PARTIAL TEAR OF THE ANTERIOR CRUCIATE LIGAMENT WITH INTRAARTICULAR JOINT FLUID.
- 2. LATERAL TRACKING OF THE PATELLA AND SUPRAPATELLAR EFFUSION.

Thank you for the courtesy of this referral.
