

BANCROFT, SANDREKA A EXAM DATE: 06/11/2022 6:30 PM PATIENT: MRI SHOULDER WITHOUT CONTRAST **BANS70090** STUDY MRN: **DESCRIPTION:** REFERRING Jurkowich, Michael DOB: 10/24/1996 PHYSICIAN: N/F Pain due to Accident. GENDER CLINICAL HISTORY

## MAGNETIC RESONANCE IMAGING OF LEFT SHOULDER WITHOUT CONTRAST

HISTORY: Pain due to accident.

TECHNIQUE: Multiplanar, multi-sequence MRI of the left shoulder was performed without intravenous contrast.

COMPARISON: None available.

OSSEOUS STRUCTURES/MARROW: Normal marrow signal.

## **ROTATOR CUFF:**

SUPRASPINATUS: There is a partial-thickness undersurface tear of the supraspinatus tendon. INFRASPINATUS: The infraspinatus tendon maintains intact tendon fibers. No tendon retraction is found. No skeletal muscle atrophy is seen.

TERES MINOR: The teres minor tendon maintains intact tendon fibers. No tendon retraction is found. No skeletal muscle atrophy is seen.

SUBSCAPULARIS: The subscapularis tendon maintains intact tendon fibers. No tendon retraction is found. No skeletal muscle atrophy is seen.

SUBACROMIAL/SUBDELTOID BURSA: No fluid in subacromial-subdeltoid bursa to suggest bursitis.

MUSCLES: No muscle edema or fatty muscle atrophy.

AC JOINT: AC joint hypertrophy may contribute to rotator cuff impingement.

BICEPS TENDON: Intact long-head of the biceps tendon.

LABRUM/LIGAMENTS: No labral tear or ligament abnormalities.

CORACOACROMIAL LIGAMENT/ROTATOR INTERVAL: Rotator interval is normal.

EXAM DATE: 06/11/2022 6:30 PM BANCROFT, SANDREKA A PATIENT: BANS70090 STUDY MRI SHOULDER WITHOUT CONTRAST MRN: **DESCRIPTION:** 10/24/1996 REFERRING Jurkowich, Michael DOB: PHYSICIAN: F CLINICAL N/F Pain due to Accident. **GENDER** HISTORY

**GLENOHUMERAL CARTILAGE: Intact articular cartilage.** 

SYNOVIUM/JOINT FLUID: No joint effusion or synovial thickening.

NEUROVASCULAR STRUCTURES: Normal in course and caliber.

**PERIPHERAL SOFT TISSUES: Normal.** 

## **IMPRESSION:**

- 1. Partial-thickness undersurface tear of the supraspinatus tendon.
- 2. AC joint hypertrophy may contribute to rotator cuff impingement.
